

Economic Growth Region 10

Statistical Data Report for November 2012, Released January 2013

Regional and State Unemployment (seasonally adjusted)

Regional and state unemployment rates were generally lower in November. Forty-five states and the District of Columbia recorded unemployment rate decreases and five states had no change, the U.S. Bureau of Labor Statistics reported. Forty-three states and the District of Columbia registered unemployment rate decreases from a year earlier, six states experienced increases, and one state had no change. The national jobless rate, 7.7 percent, edged down from October and was 1.0 percentage point lower than in November 2011.

Nevada continued to record the highest unemployment rate among the states, 10.8 percent in November, followed by Rhode Island at 10.4 percent. North Dakota again registered the lowest jobless rate, 3.1 percent. In total, twenty-five states reported jobless rates significantly lower than the U.S. figure of 7.7 percent, nine states had measurably higher rates, sixteen states and the District of Columbia had rates that were not appreciably different from that of the nation.

Economic Growth Region (EGR) 10

Clark, Crawford, Floyd, Harrison, Scott, and Washington Counties.

Unemployment Rates by State, November 2012 (seasonally adjusted)

U.S. - 7.7%
 Illinois - 8.7%
Indiana - 8.0%

Labor Force Projections

These are the official labor force projections for the State of Indiana released in November 2012 by the Indiana Business Research Center.

"If these projections by our partners at the Indiana Business Research Center hold true, it emphasizes how important it is for Hoosiers to be committed to lifelong learning," said Scott B. Sanders, Commissioner for the Indiana Department of Workforce Development, "The role of WorkOne as re-employment and training centers around the state is vital to employers having access to a world-class workforce."

Employer costs for defined benefit and defined contribution retirement plans

(Excerpt from U.S. Dept. of Labor, Bureau of Labor Statistics, The Editor's Desk, December 2012)

Private industry employers now spend more per employee hour worked for defined contribution retirement plans (retirement plans that specify the level of employer contributions and place those contributions into individual employee accounts) than for defined benefit retirement plans (plans that provide employees with guaranteed retirement benefits that are based on a benefit formula). March 2012 private industry employer costs for defined contribution plans were 60 cents per employee hour worker, compared to 43 cents for defined benefit plans.

Employer costs per employee hour worked for defined benefit and defined contribution retirement benefits, private industry workers, March 2012

Source: U.S. Bureau of Labor Statistics.

Employer costs for defined benefit plans were higher for natural resource, construction, and maintenance employees (\$1.10) than for workers in other major occupational categories.

Employer cost of defined benefit plans for union workers (\$2.00) is approximately 7 times higher than the cost for nonunion workers (26 cents).

Employers with 500 or more workers have defined benefit costs (99 cents) that are approximately four times higher than the defined benefit cost for employers that have 1 to 99 employees (23 cents).

These data are from the [National Compensation Survey - Benefits](#) program. To learn more, see "Retirement costs for defined benefit plans higher than for defined contribution plans" [Beyond the Numbers](#), December 2012.
